

Z600 Rivet Placing Tool

Rivet sizes 2.4 - 5.0 millimetre Diameter

Issue #5-2015

The Z600 is a hydro-pneumatic rivet placing tool designed to install break-stem rivets speedily into most materials. Designed to install small to medium size fasteners the Z600 comes supplied with nose tips to install 2.4, 3.0/3.2, 4.0, and 4.8/5.0 diameter fasteners. The tool requires a compressed air supply to operate and is suitable for medium volume assembly work.

Operation notes:

The tool comes with a 1/4 BSP female thread. We recommend that airline fittings are installed using either PTFE tape or some form of thread sealant.

To ensure maximum tool life, a drop of air line oil should be introduced into the tools compressed air inlet periodically and before storage.

Periodically the nose housing should be removed and the jaw spreader assembly dismantled and cleaned to remove debris from the jaws.

Safety:

The tool should not be operated without the stem deflector in place.

The tool should not be pointed at anybody when connected to the air supply.
